TITLE : RADIO SYSTEM MUSICAL TONE GENERATION SYSTEM

BEST AVAILABLE COPY

ABSTRACT : PURPOSE: To lighten the burden of the operation of panel operation elements on a player during a musical performance and to generate music which is more attractive by enabling plural players to join in a musical performance of optional performance parts.

CONSTITUTION: The musical tone generation system consists of an electronic organ 30 and a drum pad device 40 so that a musical tone based upon musical tone information obtained by the playing operation of the electronic organ 30 and a musical tone based upon musical tone information generated by the playing operation of the drum pad device 40 as external equipment and received by radio through a radio reception part 5 are generated at the same time by using the musical tone generating circuit 7 of the electronic organ 30, so plural players are put in partial charge of the musical performance of respective performance parts to obtain an orchestral musical performance.
